

A Message from your Pension Advisory Committee

Are you on the right track? Are your investment decisions consistent with your tolerance for risk?

Sun Life provides an online **Investment Risk Profiler** to help you determine your risk tolerance and to appropriately allocate your retirement assets. It is recommended that you complete and save this asset allocation tool by going to www.sunlife.ca/member.

Sign in.

Select **my info Café**.

Under the **Resource Centre** drop-down menu, select **My Money Tools**.

Select the **Asset Allocation** option.

A new feature will be introduced later this month to alert you when a fund transfer does not fall within your target investment mix and is beyond your risk tolerance level. And, don't forget the **Retirement Planner** which helps you navigate through retirement planning with an action plan on how to meet your goals.
