

SECTION 6: SETTINGS

Category Graphical Settings

Selecting Settings | Zoom in a category window allows the user to zoom in and out of the displayed graph.

Selecting Settings | Show VGJ Controls allows to user to toggle the VGJ controls at the bottom of the window.

Selecting Settings | View GML allows the user to view the GML for the category.

Server Settings

Selecting Settings | Set Server in the main window displays a dialog for changing the default server and directories from which categories and functors can be loaded using the appropriate load command.

Endomorphism Limit

Selecting Settings | Endomorphism Limit in the main window displays a dialog for changing the endomorphism limit. The endomorphism limit is a check built into many tools to alert the user to a possible inaccuracy of the results; if the endomorphism limit is passed (there are too many loops in the category), a warning is issued with the results of the tool.
